

Project Design Phase-I
Proposed Solution Template

Date	19 September 2022
Team ID	PNT2022TMID16757
Project Name	Project - Plasma Donor Application
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	To develop a web or mobile application for plasma donation.
2.	Idea / Solution description	A web application can be developed to implement plasma donation website using IBM DB2, flask, etc,
3.	Novelty / Uniqueness	Using latest technology lasts in market, reach high among people, and meets their needs. Real Time applications help people to donate and receive plasma easily.
4.	Social Impact / Customer Satisfaction	Plasma is one of the needs nowadays. So, plasma donation will help other patients. Developing a application may help the needy to receive plasma or donate plasma.
5.	Business Model (Revenue Model)	The application development has no cost for development. Hence It is not paid application. It can be made as paid app for other private company.
6.	Scalability of the Solution	The solution used to build the application is unique and lasts in market. So the solution scalability is high.
